

WEB AND PRINT MEDIA – DESIGN AND DEVELOPMENT

LETTER RED DESIGN is a small design studio, based in Argyll, Scotland, run by David Roberts. I build accessible and stylish websites for clients and have over eight years experience working in graphic design and web development.

Designing and building useable websites that account for speed, readability and accessibility; using web standards, is what I aim to achieve.

Services:

Graphic design

Concept design, Logo design, Art direction.

Production

Print Production, Pre-press, Project management.

Websites

Modern websites, Web Development, Wireframes, Re-design, E-commerce, Content management system (CMS).

Hosting

Hosting for your website at a competitive price can be provided while delivering a consistently high quality of service.

Background:

I have studied visual arts at Camberwell College of Arts and Birbeck - University of London. This has given me the skills to visualize, design and develop for today's world in both web and print media.

I have a wide range of expertise to help your business stand out in the marketplace, through a website, a publication, re-branding or a combination of these.

To do this, I research your business and what it is you are trying to say, and then work with you to achieve that goal.

I would like to highly recommend Letter Red Design - David Roberts for the excellent visually stunning web pages he created for my company Stitch Exhibition Fabrics Ltd. His professionalism, vision and attention to detail from conception to launch is fully represented in the finished pages. The website speaks for itself and it's clarity enhances my business, which is a reflection on Letter Red Design.

Managing Director
Stitch Exhibition Fabrics Ltd.*

We are delighted with the website Letter Red Design - David Roberts created for our school. Working to a very complex and often changing brief, he delivered exactly what we were looking for - a visually attractive website which presents a wide range of information about the school responsive to the needs and interests of a variety of different users. I recommend him wholeheartedly.
